

I, Larry McAdoo, general manager of public radio station, WJSU-FM on the campus of Jackson State University in Jackson, Mississippi am strongly supportive of the Commission's effort to approve the kind of flexibility that will allow radio stations to scale the digital portion of its hybrid FM broadcast from 96 kbps to lower rates in order to allow for second or third channels, as we, the broadcasters see fit. Securing FCC approval for multiple audio channels is vital to the success of HD radio.
